Made in Australia SINCE 1982

CREATORS OF

WARNING: Read and understand this instruction manual before operating this unit and retain for future reference. Failure to follow operating, safety and maintenance instructions outlined in this manual releases the manufacturer from any responsibility for any accidents or damage incurred and may render any warranty void.

INTRODUCTION

Spitwater Australia is proudly Australian owned and operated since 1982. Our promise is to provide our customers with superior quality high pressure cleaners built to the highest of standards that will see many years of reliable service.

The Spitwater range of high pressure cleaners has been designed to give safe, efficient and dependable service when the correct operating and safety instructions are followed and proper attention is given to all required maintenance procedures in order to maintain the unit in peak operating condition.

This manual provides the up to date information necessary for the user to operate the unit and carry out regular inspection and maintenance.

Please note that the information given within this manual may be subject to revision in compliance with Spitwater Australia's policy of continual improvement.

Spitwater high pressure cleaners should only be used in the manner and purpose for which they were intended and in accordance with the recommendations and safety precautions detailed in this manual.

All Spitwater high pressure cleaners undergo rigorous safety and operational tests before being dispatched into the market, however it is still imperative that prior to use, all operators have read and understood all information and instructions provided and are aware of possible hazards.

GENERAL DESCRIPTION & INTENDED USE

Spitwater high pressure cleaners are specifically designed to solve all problems relating to washing, degreasing, descaling and disinfecting in a wide range of commercial and industrial situations. Some examples of applications are in the cleaning, building, transport, light and heavy manufacturing and primary industries.

SPARE PARTS, ACCESSORIES AND AFTER SALES SERVICE

Spitwater has an extensive range of spare parts and accessories to suit all your cleaning needs. For spare parts, accessories and service please contact **1800 SPITWATER (1800 774 892)** and to view Spitwater's extensive range of high pressure cleaners online visit **www.spitwater.com.au**

For international spare parts, accessories and service please contact enquiries@spitwater.com

	TECHNICAL DATA

DESCRIPTION OF SYMBOLS

The following symbols are used throughout this instruction booklet in order to mark important paragraphs or sections that require particular attention. Their meaning is listed next to them for your attention.

WARNING: Failure to follow instruction could result in serious injury or even death		WARNING: Failure to follow instruction could result in damage to unit	i	TIPS AND INSTRUCTIONS to ensure safe and proper operation
PERSONAL PROTECTIVE EQUIPMENT (PPE) Eye protection recommended		PERSONAL PROTECTIVE EQUIPMENT (PPE) Ear protection recommended		PERSONAL PROTECTIVE EQUIPMENT (PPE) Safety boots recommended
PERSONAL PROTECTIVE EQUIPMENT (PPE) Respiratory protection	\bigcirc	PRESSURE GAUGE		CHEMICAL INJECTOR OPEN / CLOSE
OIL INDICATION		UNIT ON / OFF		VISUAL CHECK / VERIFICATION
MANUAL ASSEMBLY		USE APPROPRIATE SPANNER		AUTHORIZED SPITWATER SERVICE AGENT

The following symbols are used on the unit, in order to warn user of potential injury if not cautious. Their meaning is listed next to them for your attention.

CAUTION Electric shock hazard. Disconnect power before removing cover

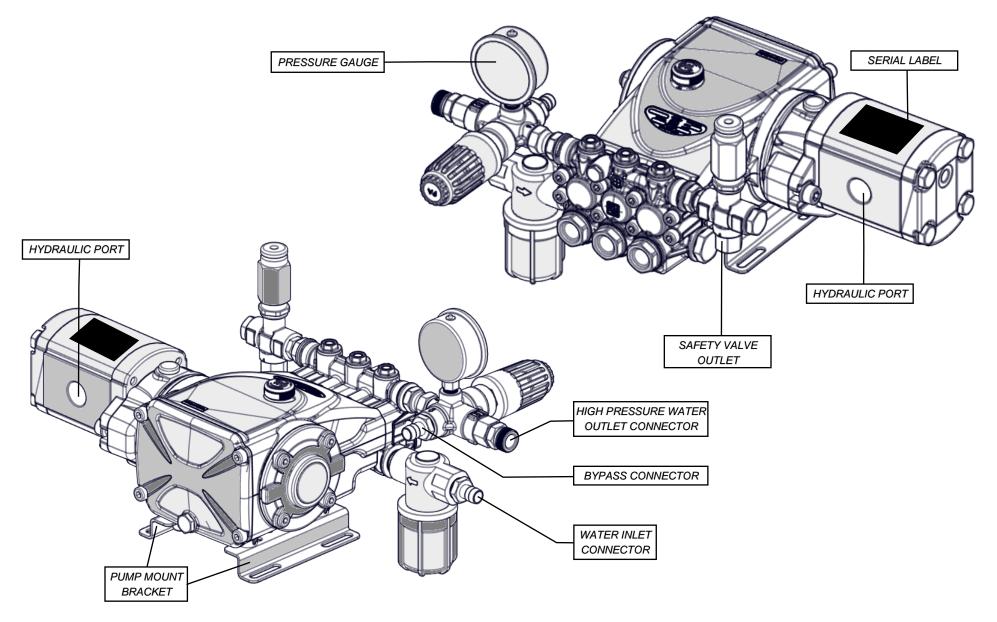

IMPORTANT SAFETY INSTRUCTIONS AND PRECAUTIONS

WARNING: This high pressure cleaner shall only be used by persons instructed in its use and who have been authorized to do so. Before using this high pressure cleaner please pay particular attention to the following safety warnings as failure to do so could result in serious injury or even death.

SAFETY LABELS, UNIT COMPONENTS FEATURES & CONTROLS

Always pay attention to the safety instructions provided on each label. Do not alter or remove safety labels

1. OBSERVE SAFETY INSTRUCTIONS

- Make sure you have read and understood the whole instruction manual before installing, operating or carrying out any maintenance on this unit.
- Warnings and data plates on the unit provide important directions and information on the safe use of the unit.
- In addition to these operating and safety instructions please make sure that all accident prevention regulations applicable in the country of use are followed.
- In addition to these operating and safety instructions any standards relating to the installation and operation of high pressure cleaners applicable in your country must be strictly followed.
- This unit is not intended for use by children. Children must always be supervised when in the vicinity and ensure that they DO NOT play with the unit. Further, it is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience or knowledge. It must only be operated by persons instructed in its use who have been especially authorized to do so.
- DO NOT operate the unit without appropriate personal protective equipment (PPE).

2. CHECKS AND SERVICE

- Inspect the unit each day before use. Follow "Daily inspection check list" guide *Table-B* in the SERVICE / CARE section.
- Service the unit regularly based on its usage. Follow "Usage vs Service frequency" Table (*Table-A*) in the SERVICE / CARE section.

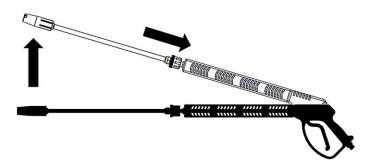

OPERATIONAL SAFETY PRECAUTIONS

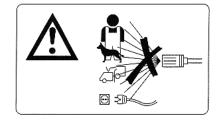

All health and safety regulations applicable to general safe work practices, as well as safe operation of equipment, as well as any specific standard for safe operation of high pressure cleaners according to local regulations must be followed. When operating this unit,

1. PERSONAL SAFETY

- Personal protective equipment (PPE) must be worn when operating this unit including footwear, clothing, eyewear and all other necessary equipment according to regulations and requirements.
- Always wear appropriate ear protection if the noise level indicated in the technical data of this appliance exceeds 80dB (A).
- When operating the unit be alert and hold onto the gun and lance firmly with both hands.
- When the gun is operated, the user is subject to very strong recoil forces and torque.

- There is a risk of high pressure water jet injury. Never aim the jet at yourself, other people or animals as this could result in serious injuries or even death.
- There is a risk of electrocution. Never aim the water jet at the unit itself or other live electrical equipment as this could result in serious injury or even death.
- Depending on the application of high pressure cleaners, hydrous aerosols may be formed. The employer / user shall perform a risk assessment in order to specify the necessary protective measures regarding aerosols, depending on the surface to be cleaned and its environment. Shielded nozzles can be used for high pressure cleaning, which will reduce the emission of hydrous aerosols dramatically OR respiratory masks of class FFP 2, an equivalent or higher are suitable for the protection against hydrous aerosols.

2. WORK ZONE SAFETY

- The work zone must be kept clear of all persons not authorized to be there. If other people must be in the work area they too must wear all necessary personal protective equipment and must be aware of the existing hazards / risks.
- When operating the unit make sure the operating area is not releasing health or environmental hazardous substances (E.g. asbestos, oil etc.)

3. EQUIPMENT SAFETY

- Never exceed the maximum working temperature and pressure as indicated on the unit data plate and in this manual.
- Only use this unit with cleaning chemicals recommended by Spitwater. The use of other cleaning agents or chemicals may adversely affect the safety of the unit.
- Never operate the unit without water as even a brief operation without it will cause severe damage to the pump and other components.
- When finishing work, switch OFF the unit and disconnect power supply, release any trapped pressure in the hose and engage the gun trigger lock.
- Never leave the unit unattended while it is running.
- Never lock the spray gun trigger in the open position.
- Never use accessories or spare parts that were not designed for use with this unit as this could cause damage to the unit. Spitwater recommends the use of original accessories and spare parts available through Spitwater and its extensive dealer network.
- Never use a nozzle size other than that specified in the technical data. Using the wrong sized nozzle could damage the unit.
- Keep flammable materials away from, and do not place anything on the unit while it is running.

SAFETY FEATURES OF THE UNIT

Pressure regulating valve: This unit is equipped with a pressure regulating valve which prevents damage to the unit by keeping the system pressure safely below a desired limit. When the system pressure exceeds the setting of the valve spring, the fluid unseats the valves and bypasses to the reservoir.

Safety valve: This acts as a fail-safe system. When the system pressure exceeds the set value, the valve opens proportionally with increase in pressure and release the excess pressure out and resets back.

In case of EQUIPMENT FAILURE / BREAKDOWN turn the unit OFF and see "SERVICE / CARE RECOMMENDATIONS AND DIY TROUBLESHOOTING GUIDE" section.

STORAGE / TRANSPORT

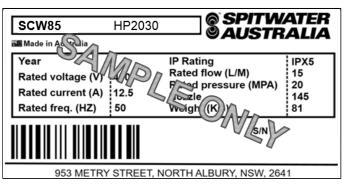

- For safe movement of the unit between work areas make sure that the unit has been switched off.
 Allow it to cool down if necessary. Bleed any trapped pressure according to instructions and confirm all safety locks are engaged.
- 2. For safe transportation in and on vehicles, make sure the unit is appropriately strapped in order to prevent it from sliding or falling.
- If transporting the unit make sure there is no possibility for the temperature to be at or below 0°C. If it is necessary to transport the unit at or below 0°C contact your authorized Spitwater service agent for advice.
- 4. When not in use the unit must be stored in a dry building where there is no possibility for the temperature to be at or below 0°C. If necessary to store the unit at or below 0°C contact your authorized Spitwater service agent for advice.

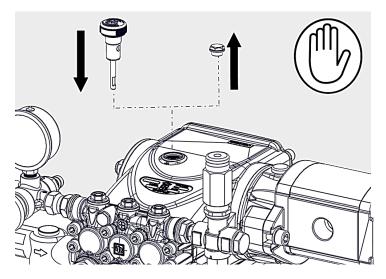

PROTECT FROM FROST

ASSEMBLY & INSTALLATION GUIDE

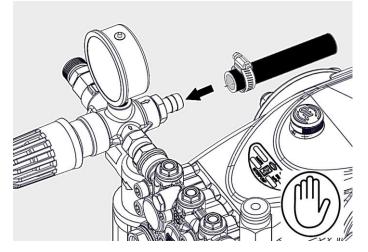

- 1. Caution should be taken when lifting the unit. Always adopt safe lifting techniques in order to avoid damage to the unit and injuries to person.
- 2. Remove carton and carefully remove the unit from the pallet keeping it upright. Visually check for any damage, leaks or other issues. If any problem is found, contact your Spitwater agent immediately.
- 3. Identify the unit from the information on the serial label affixed to the unit.

- 4. The motor-pump unit cannot be fixed rigidly to the chassis or to the base, but it is necessary to use proper anti-vibration elements. Also the unit must be installed horizontally using the bracket.
- 5. Replace the red oil travel plug fitted on the pump with the yellow dipstick supplied in the accessories bag.

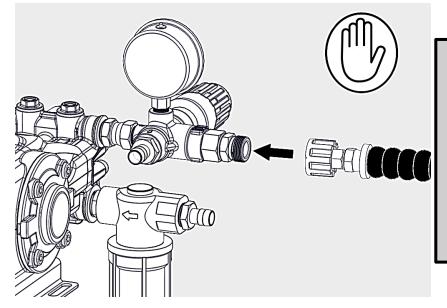

- 6. Check the oil level in the pump using the dipstick or the sight glass on the back / side of the pump. Make sure the level is between min/max level notches on the dipstick, or is level with the indicator on the sight glass. If oil reservoir needs replenishing only use oil of a type as listed in the data sheet in this instruction manual.
- 7. Connect the Bypass outlet to the water reservoir by a 1/2" hose and hose clamp.

- 8. HYDRAULIC MOTOR INLET AND OUTLET LINE:
 - For a correct hydraulic motor inlet and outlet line, please refer to the attached INTERPUMP manual.

8. ASSEMBLY OF HIGH PRESSURE HOSE WITH THE UNIT

• Connect the quick release high pressure hose to the outlet connector of the unit.

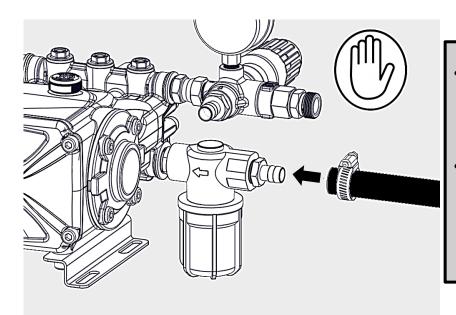

- High pressure hoses, fittings and couplings are important for the safety of the machine. Use only high pressure hoses, couplings and fittings recommended by Spitwater.
- Do not pull on high pressure hose in order to move the unit.

9. WATER INLET CONNECTION

- Connection to potable water mains can be achieved by fitting a general garden hose (1/2 inch diameter).
- Connect the water supply hose to the water inlet connection. In case of poor water quality the use of an external water filter is recommended. Contact your Spitwater agent for advice and /or supply.
- Make sure the water supply temperature and pressure meet the values specified in the technical data, then turn the water supply on. Visually check for leaks and contact your Spitwater service agent if found.
- Open the water supply and check for any leaks.
- Water that has flowed through backflow preventer is considered to be non-potable (non-drinkable).
- For suction supply / non-pressure water supply, other than potable water mains, contact your authorized Spitwater service agent for advice.

WARNING:

- This high pressure cleaner is only allowed to be connected with the drinking water mains, when an appropriate backflow preventer has been installed, as per AS/NZS 60335.2.79.
- Follow all local standards and regulations applicable to water connection.

OPERATING INSTRUCTIONS

GENERAL PRE-START CHECK

 Inspect the unit every day to confirm that it is safe and in proper working order before putting it into service. Follow the "DAILY INSPECTION CHECK LIST" in the SERVICE / CARE section as a guide. If the unit is damaged or faulty in anyways, DO NOT use it, and immediately contact your authorized Spitwater service agent for advice.

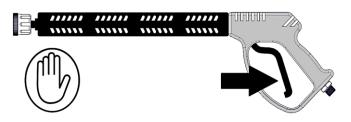

TO START

1. Always wear appropriate Personal Protective Equipment (PPE).

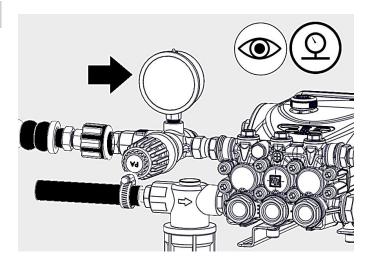

TO USE

- 1. Release the spray gun trigger lock.
- 2. Pull the trigger on the spray gun and allow water to run through the system for a few minutes to expel air from the hydraulic system. If air remains in the system, open and close the spray gun a few times to expel. <u>Note:</u> If this is the first use of the unit or the unit has been left idle for an extended period of time it is advisable to run this operation with the front part of the lance disconnected in order to avoid debris or scale being lodged in the nozzle and blocking it.

3. Check that the pressure indicated on the pressure gauge matches the value on the data plate and in the technical data. Also check that when the trigger is released the pressure shown on the gauge returns to zero.

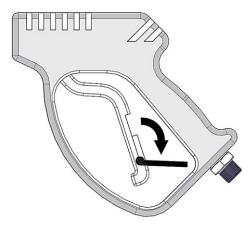

USAGE TIPS:

- Use the unit as necessary to carry out cleaning while trying to minimize where possible opening and closing the spray gun trigger as this will lead to premature wear of the parts.
- Do not hold the nozzle too close to the surface to be cleaned as this may damage the nozzle. Start cleaning at a comfortable distance and work closer as necessary.

TO STOP

1. Release all trapped water pressure in the unit by pulling the trigger of the spray gun, then engage the spray gun trigger lock. Failure to follow this instruction will leave the unit in a potentially unsafe manner.

SAFETY PRECAUTIONS

- To ensure machine safety, use only original spare parts from the manufacturer or approved by the manufacturer.
- Carry out all regular maintenance and inspections as listed in this manual using original Spitwater parts where required.
- 3. Always make sure before carrying out any maintenance that the unit is turned off, allowed to cool down and any trapped high pressure in its system has been released.
- 4. Never carry out any maintenance work not specifically outlined in this booklet and never make any technical modifications to this unit.
- 5. This unit is fitted with safety devices which are set and sealed at the factory. It is very important these devices receive their routine maintenance to assure your safety as well as necessary protection of the unit.
- 6. There are a number of important components that have been set and sealed at the factory. Never under any circumstances tamper with, modify or adjust these settings.
- 7. Make sure this unit is regularly serviced by an authorized Spitwater service agent according to the servicing requirement outlined in this booklet.

SERVICE INSTRUCTIONS

To maintain this unit in peak working condition during its operating life it is necessary to carry out regular maintenance operations and replace worn or broken parts immediately upon their failure. Spitwater recommends that all maintenance is carried out by an authorized Spitwater service agent using original Spitwater spare parts.

Failure to follow the maintenance guidelines in this manual releases the manufacturer from any responsibility in reference to injuries and damages to both persons and goods.

Refer attached INTERPUMP manual for detailed maintenance guide.

		CHECKED & OK			
ł	Ł	ATTENTION REQUIRED			
		CHECKS BEFORE UNIT START			
.4	X	Ensure all guards, covers and shields are in place before operating the unit.			
	X	Check that the outside of the pump is clean, and check for any water leaks and oil leaks.			
		Check high pressure hose for kinks, damage or exposed braids. If the hose is damaged in any way the unit must not be used and the hose replaced immediately.			
.4		Check pump oil level and make sure oil colour has not gone "milky" in appearance.			
		Check for any service due, based on "USAGE VS SERVICE FREQUENCY" Table-A.			
		CHECKS DURING UNIT RUN			
		Check for proper functioning of pressure gauge.			
.4		Check for water leaks at high pressure hose fittings.			
.4		Check pressure gauge to show working pressure as per Technical data sheet, when the trigger is in ON position.			
		Unusual noise from unit.			
	6	Unit is fit, proceed task STOP operting the unit, Contact Spitwater service agent immediately			

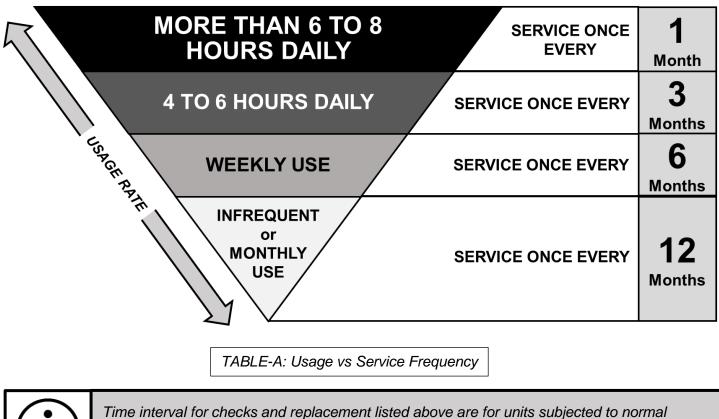

Contact Spitwater service agent / Qualified person for assistance

agent immediately Do It Yourself,

USAGE VS SERVICE FREQUENCY

operating conditions. Should the unit be subjected to abnormal conditions (e.g. heavy use, dirty water, extreme temperatures or conditions etc.) times should be reduced accordingly.

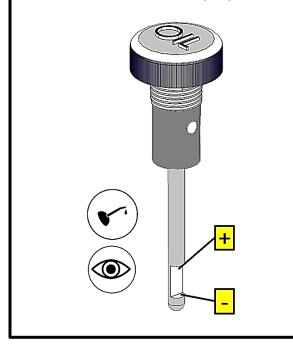

OIL CHECK POINT

PUMP OIL CHECK

Ensure the unit is on a flat surface.

Check the oil level in the pump using the dipstick or the sight glass on the back / side of the pump. Make sure the level is between min/max level notches on the dipstick, or is level with the indicator on the sight glass

TROUBLESHOOTING GUIDE

If the fault cannot be identified or corrected using the below list (or remedy suggests contacting Spitwater service agent) stop using the unit immediately and contact your authorized Spitwater service agent to rectify.

TROUBLESHOOTING GUIDE					
FAULT	CAUSE				
	The pump is not primed and is operating dry.				
At start up the pump makes	The water supply of the pump is off/closed.				
no noise.	Pump valves are blocked.				
	The pump outlet line is closed and does not let the air flow out.				
	The motor flow regulator is closed.				
	Air intake and /or insufficient water supply to the pump.				
	Bends, elbows, fittings/connections on the pump inlet line are slowing down the flow of the liquid.				
Dump (motor piping pulaste	The water filter is dirty or too small.				
Pump / motor piping pulsate irregularly	The booster pump, if installed, provides an insufficient pressure and/or flow.				
inogularly	The pump is not primed due to an insufficient head, the delivery pipe is closed during priming and/or a valve is sticking.				
	Worn pump's valves and/or seals.				
	The pressure regulating valves are not working properly.				
	Water supply insufficient and/or the RPM is lower than the rated value.				
The pump does not give the	Excessive leaking from the pressure regulating valve and/or from the pressure seals.				
rated capacity and makes	Worn pump valves.				
excessive noise.	Pump cavitation due to: undersized feed pipes and/or filter, insufficient flow capacity, high water temperature, clogged filter/				
	The oil flow which powers the hydraulic motor is insufficient.				
	The appliance (nozzle) is too large or is worn.				
	Excessive leakage from the pump pressure seals.				
The pump pressure is low	The pressure regulating valve is not working properly and/or the valves are worn				
	The oil flow which powers the hydraulic motor is insufficient.				
	The pressure and/or the RPM is higher than the rated valve.				
The pump overheats	The oil in the sump of the pump is not at the required level or is not of the recommended type.
